Computational Statistics & Data Analysis 12 (1991) 387–388
North-Holland

Author Index Volume 12 (1991)

(The issue number is given in front of page numbers.)

M. Abrahamowicz and **A. Ciampi**, Information theoretic criteria in non–parametric density estimation: Bias and variance in the infinite dimensional case (2) 239–247
J. Antoch, Y. Dodge and **J. Jureckova**, Computational aspects of adaptive combination of least squares and least absolute deviations estimators (1) 87–100
J.K. Baksalary and **G. Trenkler**, Covariance adjustment in biased estimation (2) 221–230
O.E. Barndorff–Nielsen and **M. Sorensen**, Information quantities in non–classical settings (2) 143–158
H. Chernoff, Simple computer intensive methods for estimating parameters of complex models (2) 159–178
D.V. Chopra, Further investigations on balanced arrays (2) 231–237
A. Ciampi, Generalized regression trees (1) 57– 78
A. Ciampi, see **W. Abrahamowicz** (2) 239–247
L. Davies, A stochastic model for interlaboratory tests (2) 201–209
D.K. Dey and **L. Kuo**, A new empirical Bayes estimator with type II censored data (3) 271–279
Y. Dodge, see **J. Antoch** (1) 87–100
Y. Dodge and **J. Jureckova**, Flexible L–estimation in the linear model (2) 211–220
H. Drygas, Linear minimax–estimation in linear models with affine and ellipsoidal restrictions (1) 101–114
D.A.S. Fraser and **N. Reid**, Converting observed likelihood functions to tail probabilities (2) 179–185
E.W. Grafarend and **B. Schaffrin**, The planar trisection problem and the impact of curvature on non–linear least–squares estimation (2) 187–199
W.R. Javier, see **J. Rustagi** (1) 19– 26
J. Jureckova, see **J. Antoch** (1) 87–100
J. Jureckova, see **Y. Dodge** (2) 211–220
J.P. Keating, R.L. Mason, P.K. Sen and **C.R. Rao**, Pitman nearness in statistical estimation (1) 1– 18
V. Kipnis, Evaluating the impact of exploratory procedures in regression prediction: A pseudosample approach (1) 39– 56
C. Kooperberg and **C.J. Stone**, A study of logspline density estimation * (3) 327–347
L. Kuo, see **D.K. Dey** (3) 271–279
N.M. Laird and **T.A. Louis**, Smoothing the non–parametric estimate of a prior distribution by roughening: A computational study (1) 27– 38
S.–I. Liu, A robust and easy confidence procedure with moderately long–tailed symmetric distributions (3) 281–294
W.–Y. Loh, Survival modeling through recursive stratification (3) 295–313
T.A. Louis, see **N.M. Laird** (1) 27– 38
R.L. Mason, see **J.P. Keating** (1) 1– 18
S. Narula and **G. Stangenhaus**, Inference procedures for the L_1–regression (1) 79– 86

* Appeared in Section II
All others: Appeared in Section I
